

Invasive Meningococcal Disease: 2017

Los Angeles County Epidemiology Report

February 3, 2017

No new cases of invasive meningococcal disease (IMD) have been reported in Los Angeles County (LAC) this week. The total number of IMD cases in LAC in 2017 is 2, both of which are serogroup B. In 2016, there were 20 cases, 9 of whom were MSM* (Table 1). The outbreak occurring since March 2016 throughout Los Angeles, Orange, and Ventura Counties is ongoing. Twenty-eight individuals from multiple jurisdictions, most of whom are MSM, have been associated with this regional outbreak caused by serogroup C. LAC DPH and neighboring health departments continue to work with the California Department of Public Health (CDPH) and Centers for Disease Control and Prevention (CDC) to investigate. Investigations to date have not determined any common social linkages among cases in the region. Due to ongoing cases, LAC DPH and affected jurisdictions reiterate the importance of offering the meningococcal vaccination to all MSM, as recommended below, in addition to all persons with HIV infection.

*Men who have had intimate or sexual contact with another male.

Table 1. Characteristics of IMD Cases: Los Angeles County, 2016-2017

	Number of Cases ¹	Demographics		MSM	Serogroups						Deaths
		Gender M/F	Median Age (Range)		B	C	Y	W	Non-Groupable	Not Typed	
2017 (to date)	2	2/0	47.5 (NA)	0	2	0	0	0	0	0	0
2016	20	15/5	30.5 (13-76)	9	5	10	1	2	1	1 ²	0

¹ Count as of Friday 2/3/2017, 5 pm. Excludes reports from Long Beach and Pasadena. Totals are provisional and subject to change.

² Not available for typing.

Invasive Meningococcal Disease Cases by Month of Onset, LAC, 2010-2017

Table 2. IMD Cases by Service Planning Area (SPA) Los Angeles County, 2017

LOCATION	Year Total ¹	2016 Total
SPA 1: Antelope Valley	0	0
SPA 2: San Fernando	1	3 ²
SPA 3: San Gabriel	0	3
SPA 4: Metro	0	5
SPA 5: West	0	4 ³
SPA 6: South	0	0
SPA 7: East	1	3
SPA 8: South Bay	0	2
TOTAL	2	20

¹ Count as of Friday 2/3/2017, 5pm. Excludes Long Beach and Pasadena. Totals are provisional and subject to change.

² Includes a homeless resident.

³ Traveled out of county during incubation period.

Recommendations and Resources

LACDPH recommends meningococcal conjugate vaccine be offered to:

- All MSM, regardless of HIV status;
- All HIV-infected persons.

For IMD epidemiology reports and more information:
